

# MAIL ROOM SECURITY

## RECOGNIZING THREATS IN DUE TIME

Thousands of businesses receive mail threats every year. unival group gives you real-time insight into the contents of mail and parcels with a selected range of technologies. Currently, mailrooms are the weak link in the security chain. With our multi-sensor technology approach we enable our clients to quickly detect packages with potential threats.

**SIMPLE, SAFE AND EFFICIENT.**

**COMPANIES  
& GROUPS**

**GOODS  
STORAGE**

**PRODUCTION-  
STATES**

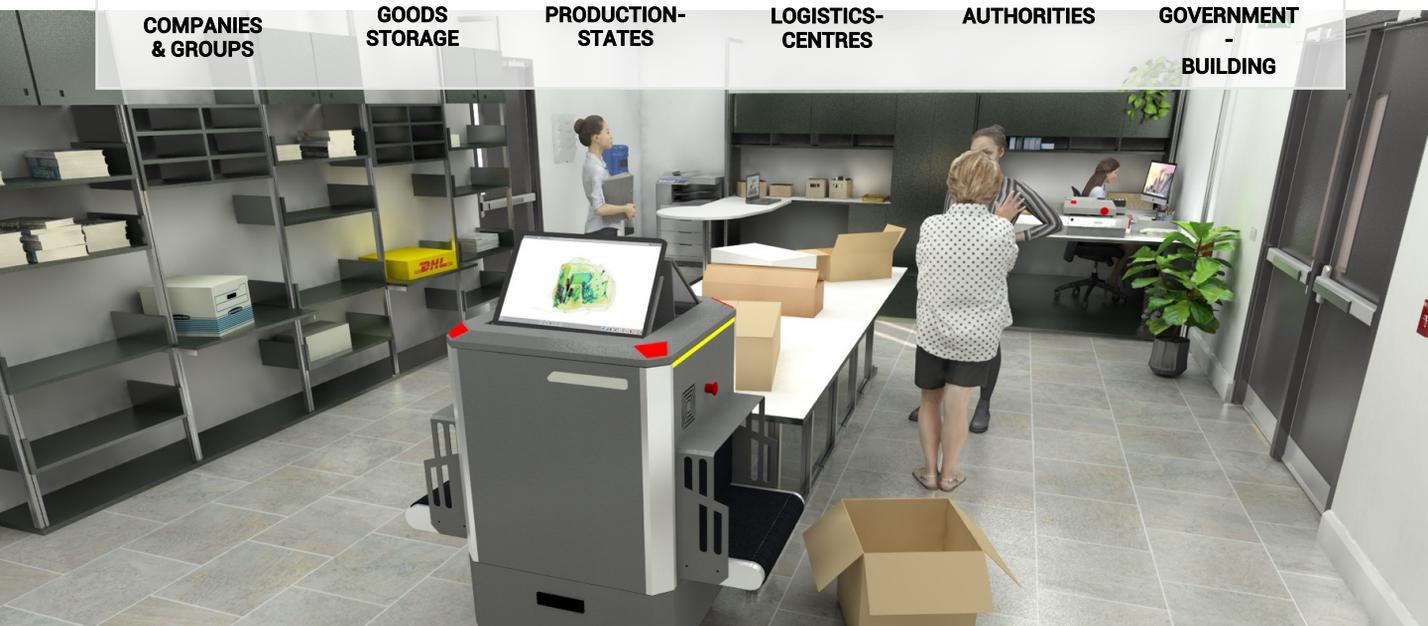

**LOGISTICS-  
CENTRES**

**AUTHORITIES**

**GOVERNMENT  
-  
BUILDING**

# REVIEW OF ALL INCOMING SHIPMENTS

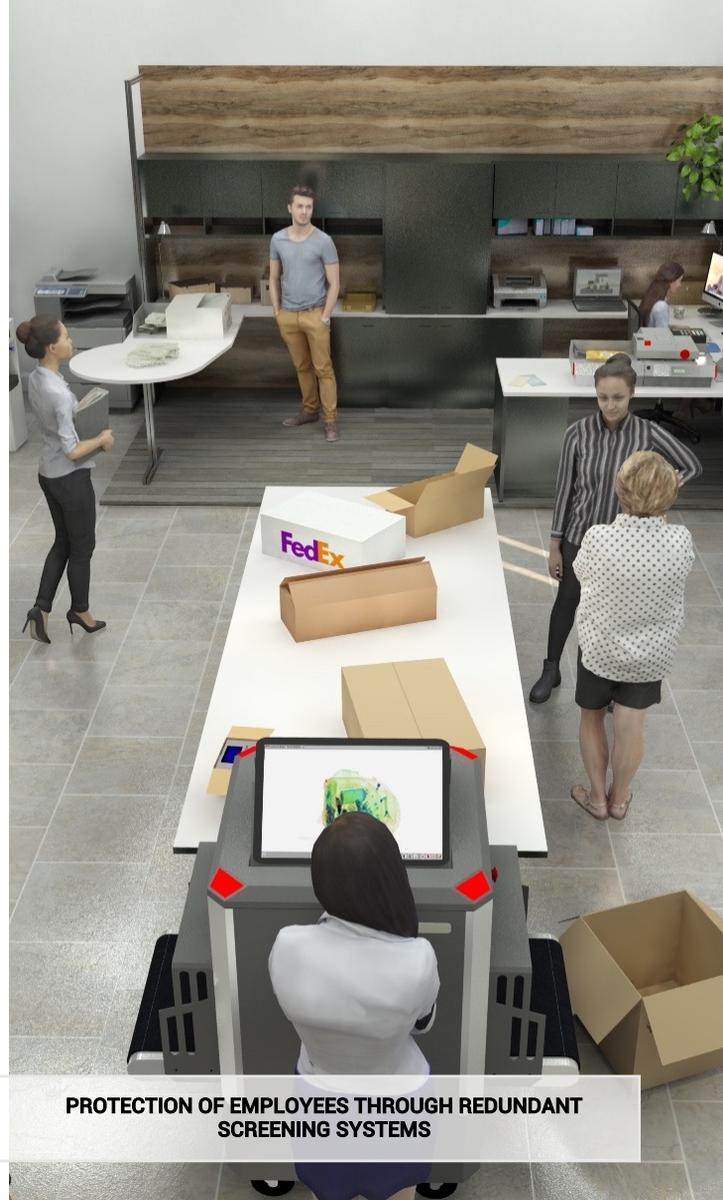

**PROFESSIONALLY CONSTRUCTED LETTER BOMBS**

Professionally constructed letter bombs can hardly be distinguished with the naked eye and must not be opened by employees under any circumstances.

**LETTER BOMBS DETECTED BY BV X-RAY SYSTEMS**

**PROTECTION OF EMPLOYEES THROUGH REDUNDANT SCREENING SYSTEMS**

Automated metal detection and state-of-the-art X-ray technology offer themselves as non-invasive inspection methods to detect threats in time.

unival group offers various & redundant screening systems, which enable the secure screening of letters and parcels - without opening them.

# SCREENING SYSTEMS

## EFFICIENT DETECTION & PREVENTION

**BV 5030CA | TABLE X-RAY SYSTEM**

The **BV 5030CA** is a compact tabletop X-ray machine and is used for the inspection of letters and parcels, with a tunnel opening of 50x30cm and integrated touch screen.

**EMIS-MAIL | LETTER SCANNER**

The **EMIS-MAIL** enables a quick check of letters and parcels up to 45 cm wide and 7.5 cm thick. Certified according to EU Regulation 185/2010 Postal Security Inspection.

**DE-TECTOR FLEX | TRACK DETECTOR**

The **DE-TECTOR FLEX** enables the detection & analysis of even the smallest explosive and drug particles and impresses with its fast identification time and intuitive handling.

**ETD-100 | INORGANIC EXPLOSIVES DETECTOR**

The **ETD-100** is a new type of explosives detector, which specifically detects inorganic explosives. Statistically, most IEDs consist of exactly these substances.

# SCREENING SYSTEMS

## EFFICIENT DETECTION & PREVENTION

TR 15 | CABINET X-RAY SCANNER

The **TR15** is a compact X-Ray cabinet scanner that provides a new benchmark of threat detection and image management and comes with an intuitive user interface via a 22inch touch screen monitor.

MAILSECUR®

**MAILSECUR®** uses secure T-rays to see inside letters and packages with 4D live imaging. It covers a critical gap to detect hard-to-detect threats as liquids, powders and drug-laced paper in mail in real time.

BV 6045DV

The **BV 6045DV DUAL VIEW X-RAY SCANNER** enables non-intrusive X-ray security screening for larger mail and big parcels. This device is very useful for larger volumes of mail and also baggage and can be screened.

BV 100100DV

The **BV 100100DV DUAL-VIEW LARGE X-RAY SCANNER** is the right choice for large boxes, small cargo and other more spacious items with non-intrusive X-ray security screening. High volume can be scanned at ease.

# SCREENING SYSTEMS

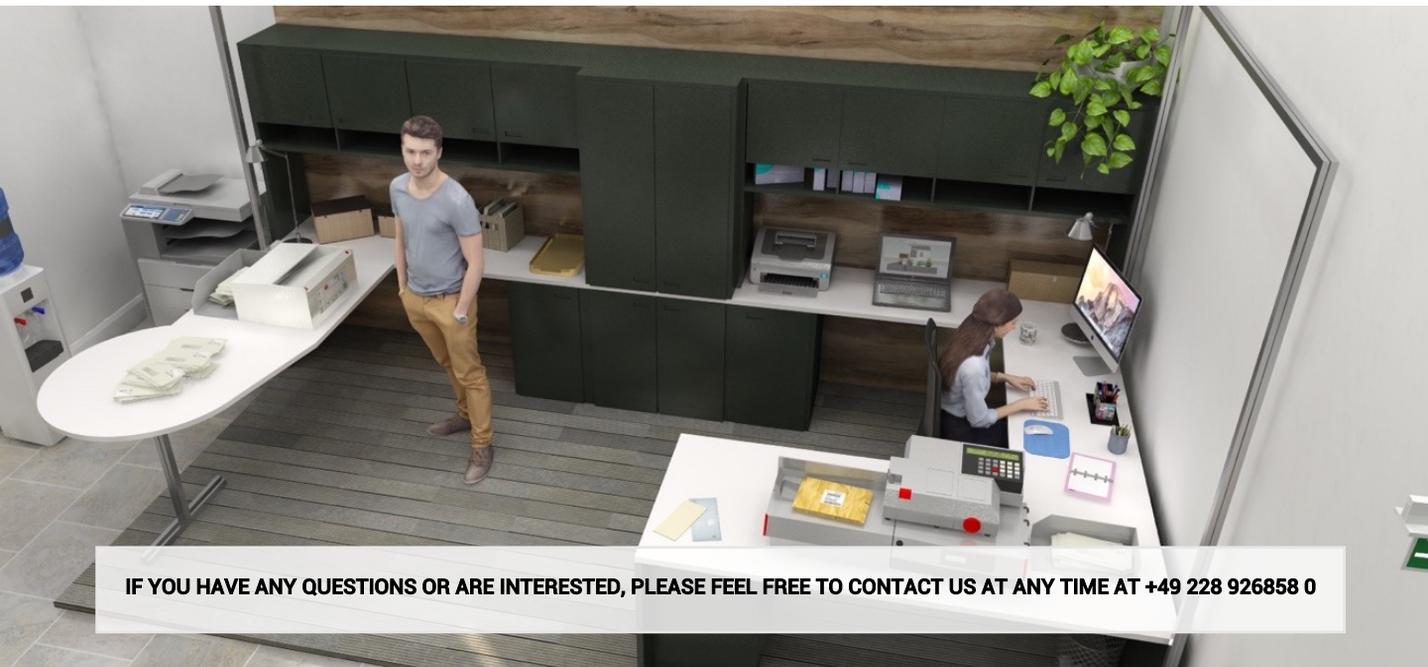

## STATE-OF-THE-ART DETECTION & PREVENTION

With a tunnel opening of up to 160x180 cm and dual-view projections, the BV series X-ray scanners are used worldwide for parcel and freight inspection.

Neuralguard's AI algorithms automatically detect hazardous materials with 90% accuracy, greatly increasing protection through precise identification.
