

COUNTER-MONITORING

ABOUT unival group

unival® group is a Bonn, Germany based group of companies specialized in governmental and corporate protection. We are operating in more than 35 countries around the world with specially selected and trained unival distributors, who represent our multi-level-protection philosophy.

As a German group we guarantee supreme quality standards, customer-orientated services and highest reliability to our international clientele.

With a strong focus on security solutions for governmental organizations, NGOs and multi-national companies, we develop and manufacture individual products as well as multi-level-security solutions that are customized for the local requirements of our clients.

Our experience and competence of more than 10 years of international business development and transactions guarantee turnkey execution of projects.

MORE THAN 15 YEARS EXPERIENCE

HIGHEST QUALITY STANDARDS

OPERATION IN MORE THAN 35 COUNTRIES

KEEP YOUR
CONVERSATIONS
CONFIDENTIAL
WITH UNIVAL

JAMMING

unival JAMMING SERIES

COUNTERING ANY TRANSMISSION IN CONFERENCES

With our jamming systems made in Germany, unival provides powerful systems for real-time countering of any transmission.

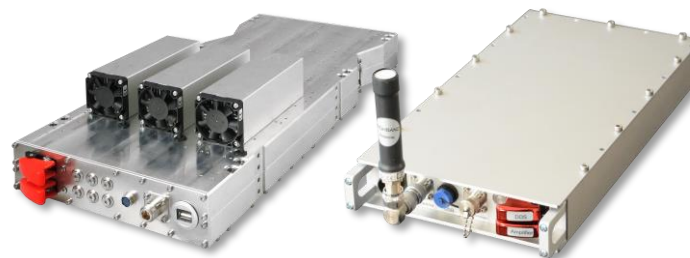

Our jammers are fully digital and modular and are amongst the most advanced systems currently available.

Make your conference rooms tab-proofed and shield them completely against any transmitter – with unival jammers.

SHIELD YOUR PREMISES AGAINST EAVES- DROPPING

MAKING YOUR
CONFERENCES
AND OFFICES SAFE

CONFERENCE ROOM JAMMERS MADE IN GERMANY

unival group offers special digital conference room jammers in different sizes and configurations, depending on the size and requirements of the room. All jammers are made in Germany and present the latest jamming technology

uniTAG EMV LC

Create small, local jamming fields on demand without compromising other networks with the uniTAG EMV LC

ACCESS SECURITY

INTEGRATED ACCESS SECURITY

KEEPING BUGS & TRANSMITTERS OUT OF YOUR PREMISES

Smuggled communication & recording devices, such as mini transmitters, cell phones, bugs, covert video cameras, etc., are still one of the major threats in for companies and private persons.

With the unival access security systems, all incoming persons are discretely screened for transmitters at the perimeter of sensitive areas.

PROHIBIT THE INTRUSION OF TRANS- MITTERS

BV 5030

Check all briefcases, small bags, etc. fast and efficient for any hidden transmitters or recording devices

uniSCAN FMD 500

The uniSCAN FMD 500 is deployed at data centers or sensitive rooms to detect even smallest transmitters and USB sticks.

**GEUTEBRÜCK
VIDEO SECURITY**

With Geutebrück you will be informed immediately about any intrusions or suspicious behavior of your staff.

REMOTE MONITORING

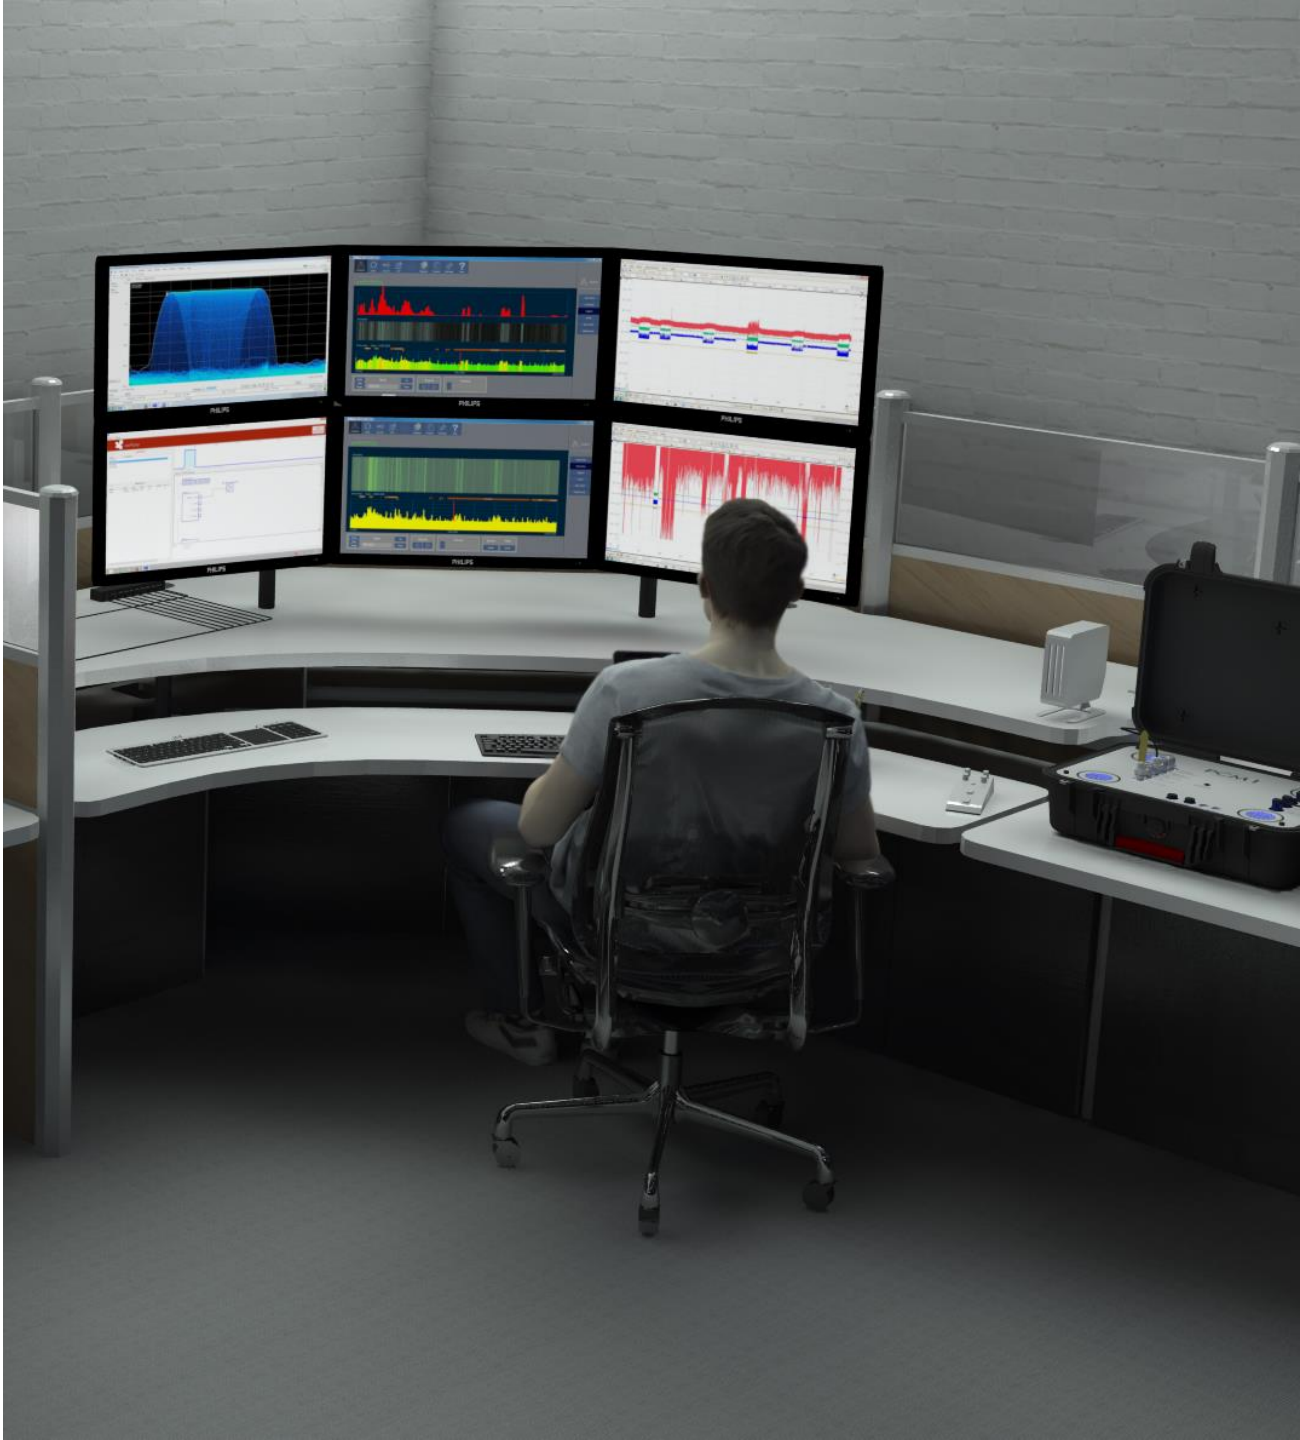

CENTRAL MONITORING

DETECT TRANSMISSIONS IN REAL-TIME

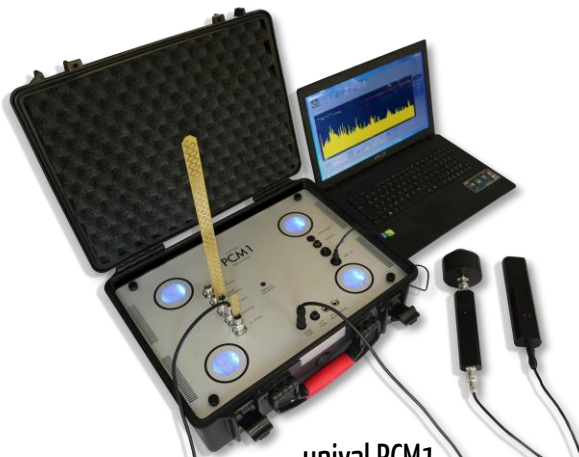

All outgoing transmissions from specific rooms can be monitored with the unival counter-monitoring systems, all operated from a central command & control room.

Even cell phone conversations in sensitive areas will trigger an immediate alarm and can be located directly.

DETECT & MONITOR ALL TRANS- MISSIONS

CENTRAL MONITORING
OF ALL SIGNALS FROM THE
COMMAND & CONTROL
ROOM

unival PCM1

Monitor frequencies in conferences and meetings in real-time with the unival PCM1 and analyze the signals immediately.

unival SAM8

Detect and locate cell phone & GSM data transmissions inside your premises.

PHYSICAL SEARCH

SEARCH FOR TRANSMITTERS

USING THE MOST ADVANCED SYSTEMS TO FIND EVERY BUG

Cleaning staff, maintenance personnel, service providers, visitors.... – many people can personally deploy eavesdropping devices and mini transmitters even in a high secure compound like an embassy.

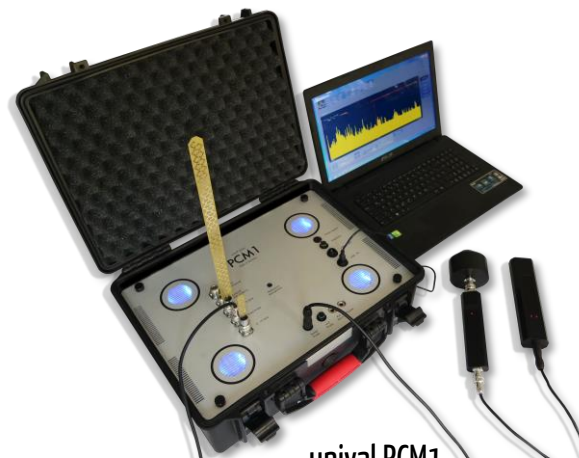

Therefore, the physical search for bugs and transmitters is crucial for embassy security and should be done on regular basis.

With our market leading systems, we give right tools and trainings for such operations, as well as offering professional sweeps by ourselves.

unival CM-SYSTEMS

WHEN MISSING A BUG IS
NOT AN OPTION

unival PCM1

The unival PCM1 provides automatic sweeps for analog and digital transmitters, as well as powerful frequency analysis tools. With the field strength and sonar probes you can pinpoint and locate any bug or transmitting device.

unival HCM1

The HCM1 provides fast scans for bugs in limited spaces or whenever a comprehensive search is not possible.

SCANSILC 2430

See through any object with the portable X-ray Scansilc 2430, which provides even full material discrimination.
