

# **SOCIAL DISTANCING?**

## **SECURITY DISTANCING IS THE ANSWER!**

How do you **protect people**, companies, government agencies, supply chains, production and public life from a virus **without locking them away?**

**With prevention, technology and process security. Let us show you how..**

## **SOMETIMES YOU NEED TO BE FAR AWAY..**

unival group® and oneclick™ **accelerate physical security checks by a factor of 25** from a safe distance with the streaming protocol of oneclick™ up to 60 frames per second can be transmitted via the Internet. This makes it possible to **operate imaging security control systems**, such as a baggage scanner on the ground floor of a building, from a central command center.

## **SEE THE HEAT..**

**Fever Screening** is a good indicator, as more than **75% of infectious diseases** have premature fever symptoms. **Body temperature measurement** is an important method for infection control.

## BUT STILL CARE FOR THE SMALL DETAILS..

With the THRUVISION LPC Terahertz camera system secure and respectful **people screening** is possible from a distance of **3 to 5 meters**, keeping a safe distance. For detection of stolen or prohibited items **under clothing**, while no radiation is generated.

## KEEP THINGS UNDER CONTROL..

PROSCREEN 200 provides passive, **ferromagnetic metal detection** for even the smallest high-value items while **completely harmless to health** and without any radiation.

## LET THE MACHINE DO THE JOB..

AI supported bag & goods search by X-RAY without operator interference, the scanner does not need an operator to check bags any longer, instead the system “decides”, if a threat is discovered inside a bag and streams the result directly via an encrypted WiFi to a tablet or supervisor station for further analysis.

## VISUALIZE AND KEEP TRACK OF THE IMPORTANT THINGS..

The GEUTEBRÜCK G-SIM alarm management system with a forensically certified database. All records are admissible as an evidence in court, tamper-proof with full DSGVO conformity. The Thruvision LPC, Proscreen 200 & BV system integration is made via a unival plug in linking video security with screening and allowing for a global networking of several locations.

## STAY ON TOP..

Drone Defence. Providing Eyes in the Sky, DroneHunter is the ultimate drone interceptor technology, with over **3500** real-world kills and effective day or night. Built with safety at its core, **DroneHunter** captures and tows away dangerous or malicious drones for forensic analysis.

**CHICKEN OR EGG?**

**The question is not what came before.**

# **INNOVATION AND SECURITY!**

## **The formula to overcome every crisis or challenge!**

### **SOUNDS GOOD!**

Let us help you to **keep your business on track**. We accept the Corona challenge and help you to improve security and safety. The current situation offers a **good momentum to innovate and digitalize projects and procedures**. Let us protect your profit and reduce losses with the **unival added value** offering **Geman quality**, dedicated project management and customized solutions with **best price/value**.
