

KEEP YOUR
DIPLOMATIC ASSETS
SAFE WITH unival

VISITOR SCREENING

COVERT WEAPON SCREENING

uniSCAN® FMD 900

With the uniSCAN FMD 900, visitors are discretely screened at the perimeter of an embassy for firearms and BBIEDS with metal shrapnell.

The uniSCAN FMD 900 is completely passive and therefore safe for pregnant women and people with pacemakers.

Furthermore, the uniSCAN FMD 900 can be installed behind walls or inside door frames, in order to generate a pre-alarm without alerting the suspect.

uniSCAN® FMD 900

SCREEN YOUR VISITORS COVERTLY
FOR ASSAULT FIREARMS AND BBIEDS

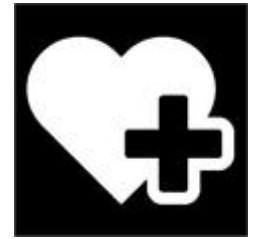

DETECTS MASS CASUALTY WEAPONS

Screens visitors at the outer premises for large firearms and BBIEDs in a pressure cooker or with a high amount of metal shrapnel

SCANS QUICKLY & COVERTLY

Highest throughput
Up to 60 people per minute,
Simple pass-by operation.
Covert screening possible

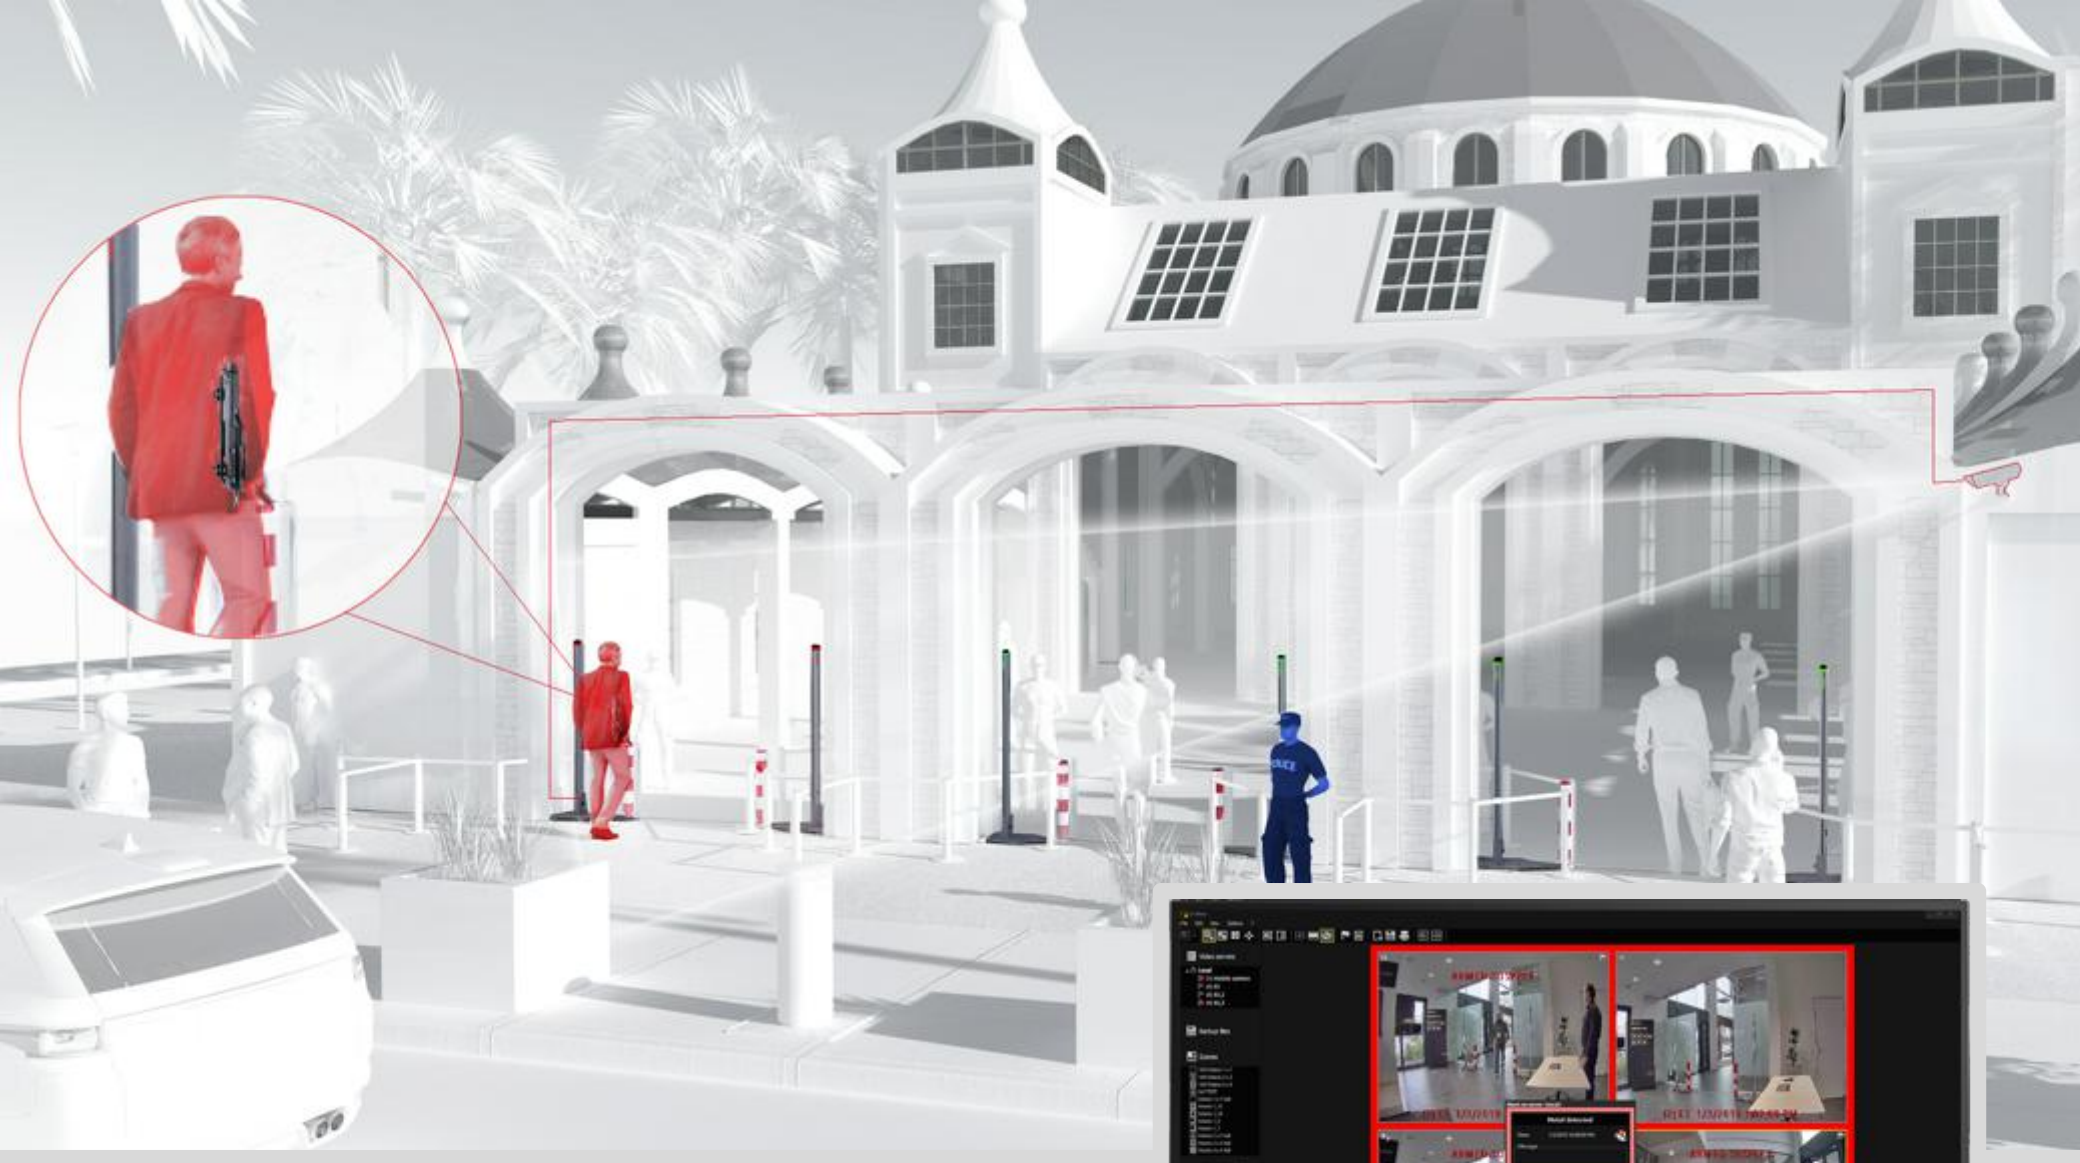

HEALTH SAFE

Emits NO signal Safe for all persons
Safe for pacemakers & pregnant

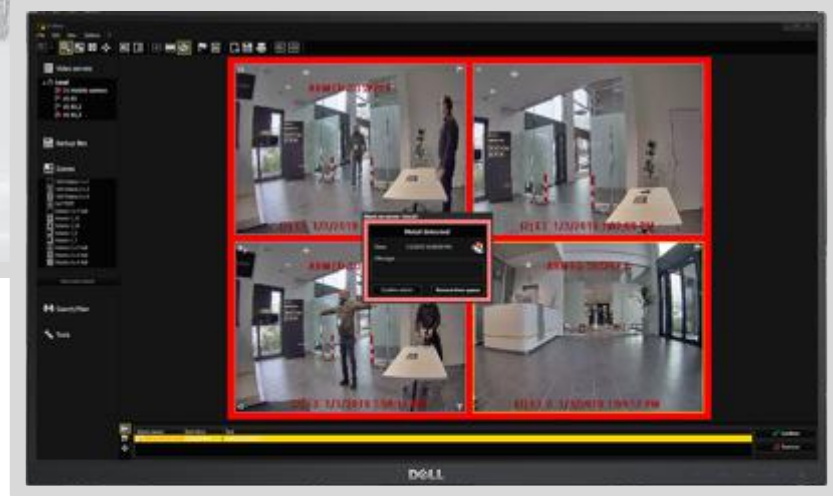

INTEGRATION INTO GEUTEBRÜCK G-SIM

Full integration into
Geutebrück's Alarm Management
System for covert person
screening via unival plugin

THE UNISCAN FMD 900 CAN BE CONNECTED TO THE GEUTEBRÜCK ALARM MANAGEMENT SYSTEM FOR A „SILENT“ ALARM, WITHOUT ALERTING THE SUSPECT.

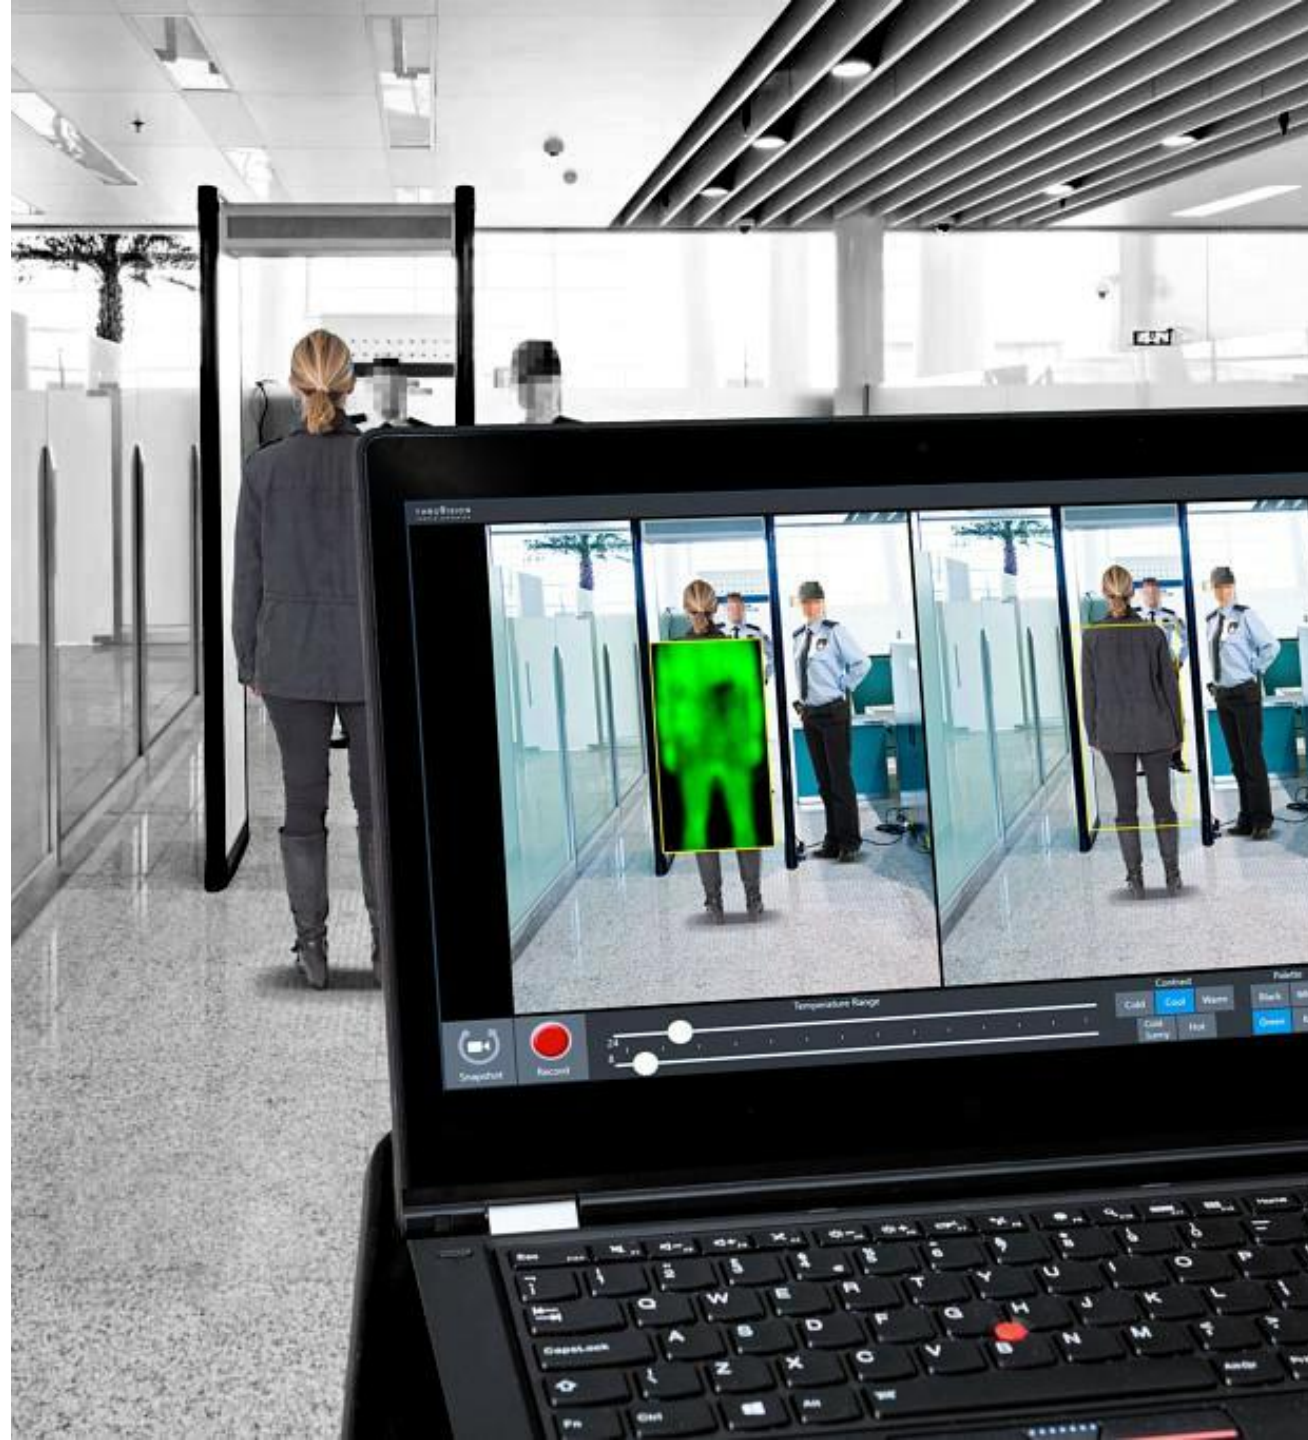

DISTANCE THREAT DETECTION

THRUVISION TAC

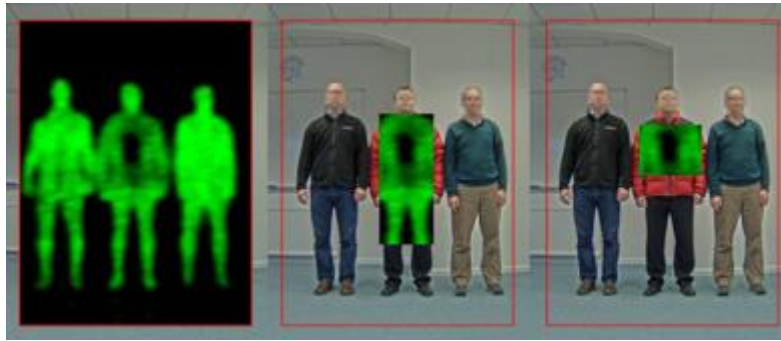

Proven people-screening camera that sees any type of item – including metal, plastic, ceramic, gel, liquid, powder and paper – hidden in peoples' clothing at distances of 3 to 10m.

Designed to screen moving people, the TAC is completely safe and non-intrusive, and uses Thruvision's patented terahertz technology.

THRUVISION TAC

VISUALIZING THE THREAT

STAND-OFF DETECTION

Designed for screening moving people for concealed threat items, as well as stationary subjects, from a distance of 3 - 10 meters

HEALTH SAFE

The TAC is completely passive and emits no radiation. It is therefore safe for all people, even pregnant or persons with a pacemaker

TESTED & APPROVED BY THE T.S.A.

High performance people-screening camera that has passed operational testing with US Transportation Security Administration

INTEGRATED INTO GEUTEBRÜCK SYSTEM

Full integration into Geutebrück's Alarm Management System via unival plugin

FULL BODY X-RAY SCREENING

COMPASS SMART

The COMPASS SMART is the newest generation of full body scanners: providing high-resolution images, automatic drug detection, highlighting of threats, object & material discrimination and intuitive to operate.

Furthermore, COMPASS SMART is completely safe according to ANSI 43.17-2009 health standard for general people screening.

COMPASS SMART can be setup quickly and even transported easily to another location, if required. Also available as dual-view version.

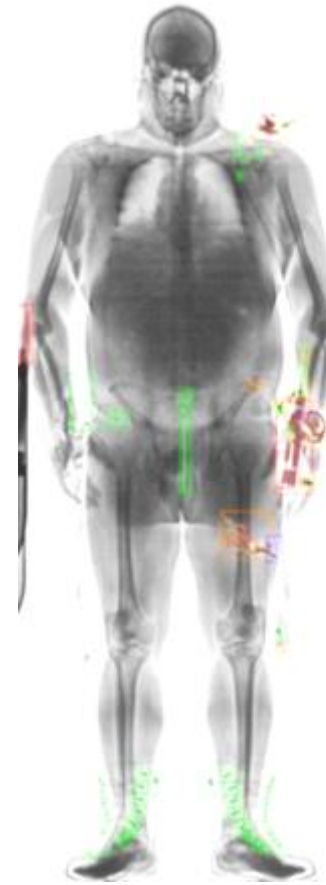

COMPASS SMART

THE WORLD'S LEADING
LOW-TRANSMISSION
X-RAY FULL
BODY SCANNER

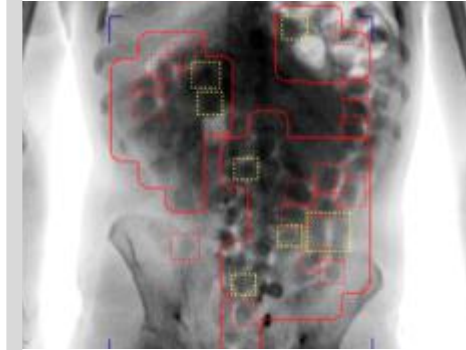

HEALTH SAFE

Radiation safe according to US health standard ANSI 43.17-2009, as a single scan emits only $>0.25 \mu\text{Sv}$ (single view)

TESTED & APPROVED BY THE T.S.A.

High performance people-screening camera that has passed operational testing with US Transportation Security Administration

AUTOMATIC DRUG DETECTION

With the internal drug detections software "Druguard®", drugs are automatically detected and marked inside the human body

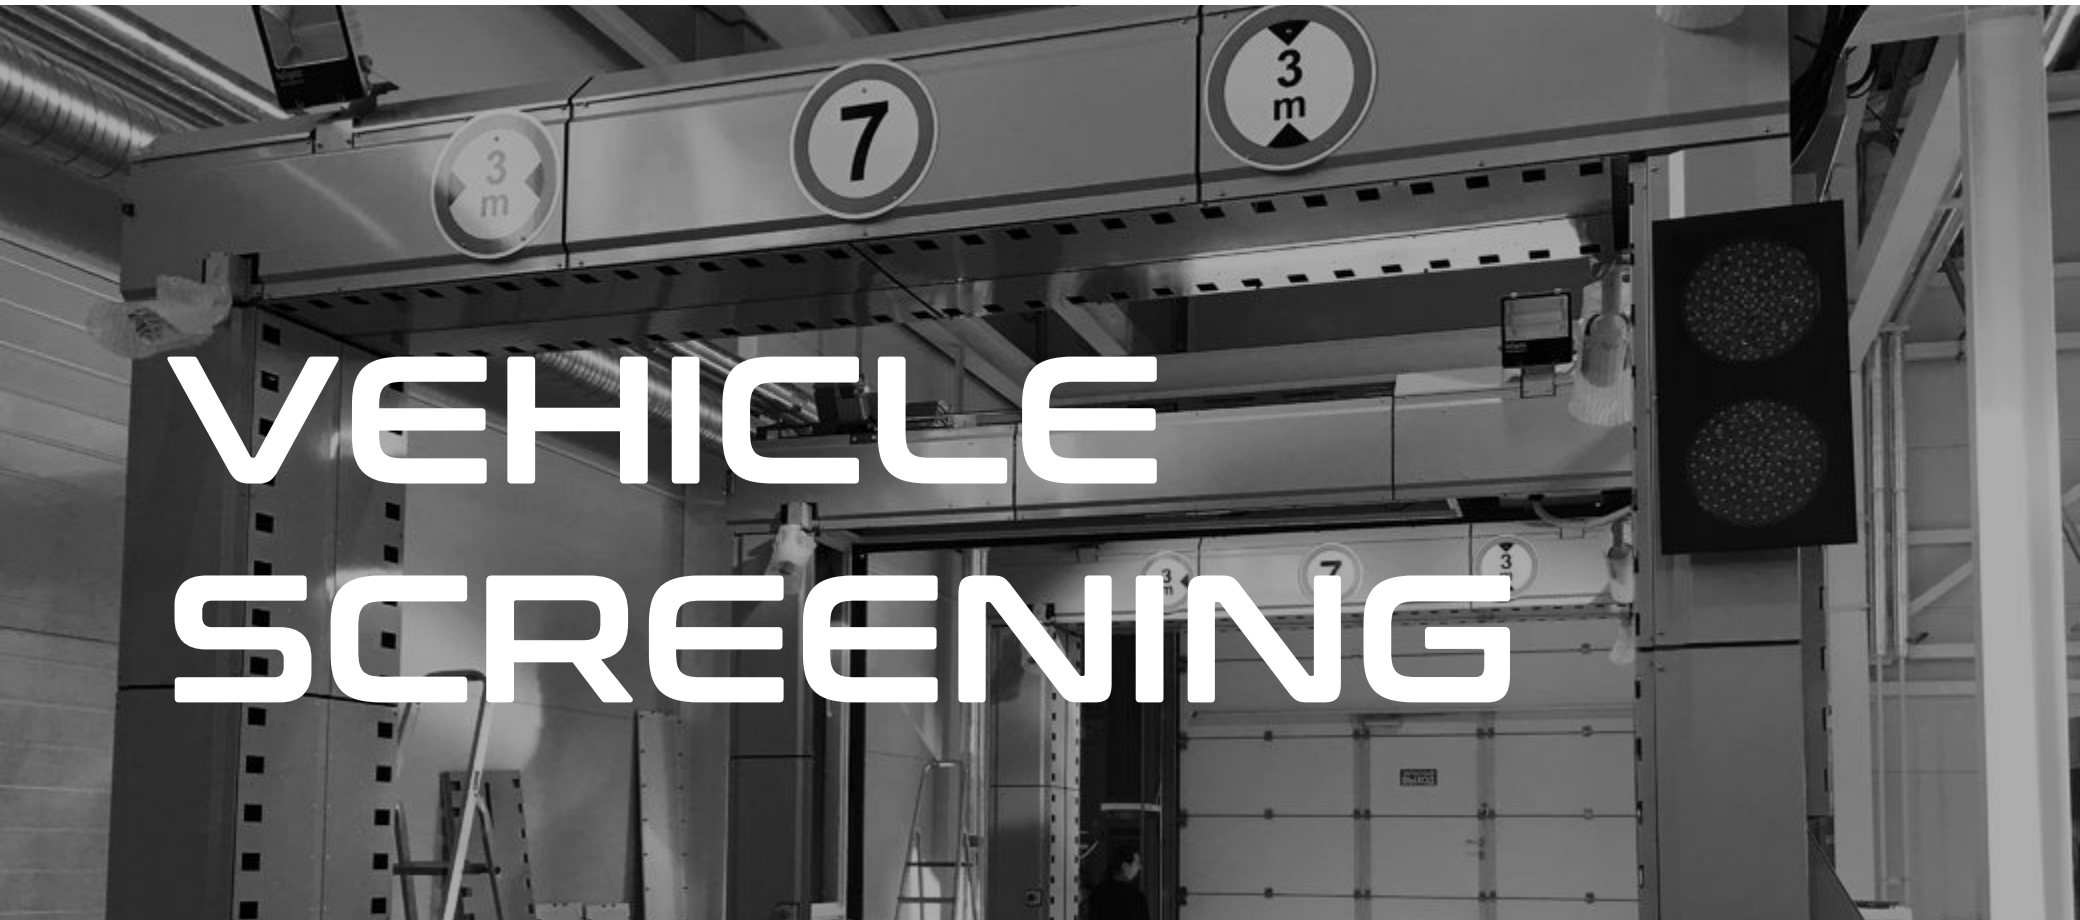

INTEGRATION INTO GEUTEBRÜCK G-SIM

Full integration into Geutebrück's Alarm Management System for covert person screening via unival plugin

VEHICLE SCREENING

VEHICLE SCREENING

DTP X-RAY PORTALS

DTP drive-through X-ray portals have been specifically designed for screening occupied vehicles, trucks and cargo.

They are the perfect solution to prohibit any smuggling of persons or threat objects into or out of a prison.

The low transmission X-ray screening makes it safe for the driver and vehicle occupants, while showing the complete interior of the screened vehicles; thus making it easy to detect any smuggled person or contraband.

DTP X-RAY PORTALS

MAKING HIDDEN THREATS VISIBLE

HIGH-RES X-RAY IMAGES WITH FULL MATERIAL DISCRIMINATION

All DTP systems provide high-resolution X-ray images, with full material discrimination, either with 3+1 or 7+1 color material coding. Threats and smuggled persons can be easily identified

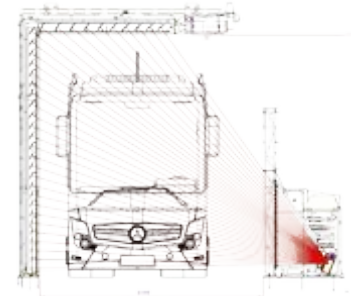

INTEGRATION INTO GEUTEBRÜCK SYSTEM

Full integration into Geutebrück's Alarm Management System via unival plugin

HEALTH SAFE

Radiation safe according to US health standard ANSI 43.17-2009, as a single scan emits only $>0.25 \mu\text{Sv}$ (single view)

HIGH STEEL PENETRATION

DTP systems provide steel penetration up to 60 mm (vehicle scanner) and 320 mm (truck/cargo scanner)

Vehicles can be screened with up to 25 km/h, which provides a high traffic flow

VEHICLE SCREENING

uniSCAN® UVMS

The uniSCAN UVMS is a state-of-the-art, automatic under vehicle screening system, which provides an unmatched quality image of the vehicle's underbody.

With its extreme HD resolution of up to 100 Mpx, it shows even the smallest details of the vehicle's underbody.

Furthermore, advanced AI algorithms are comparing every scan of the same car and alert the operator immediately, if something has been placed under the vehicle.

uniSCAN UVMS

DETECTING EVEN SMALLEST THREATS
OR CONTRABANDS

UNMATCHED RESOLUTION

With a resolution of up to 100 Mpx and a zoom down to 1 mm, even smallest deteriorations can be spotted easily

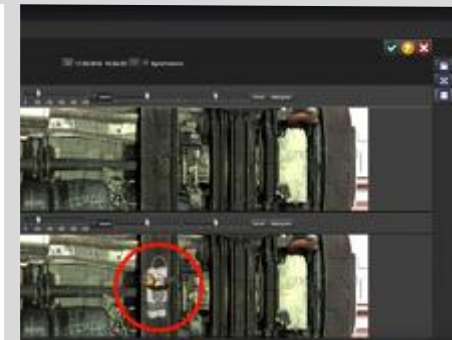

FULL COLOR SCAN

The uniSCAN UVMS provides full color scans at every weather condition, at all times of the day

FASTEST SCANNING SPEED

The uniSCAN UVMS can scan vehicles up to 40 km/h, without any loss in image quality.

AUTOMATIC COMPARISON

Advanced detection algorithms alert the operator if any deterioration to previous scans is detected

OBJECT SCREENING

X-RAY INSPECTION SYSTEMS

BV SYSTEM SERIES

The BV series are used in embassies and consulates worldwide to screen incoming handbags, and visitor's belongings, as well as incoming parcels, mail and supplier deliveries.

The BV series comes with enhanced threat detection capabilities,

BV X-RAY INSPECTION SYSTEMS

FOR FINDING CONTRABANDS,
WEAPONS & THREATS

BEST MATERIAL DISCRIMINATION

The latest generation of BV systems comes with an incredible material discrimination, showing the different material types in a very clear and definite color pattern

TOUCH SCREEN OPERATION

The GUI of all BV systems has been specifically developed for touch screens, thus making the operation more efficient than ever.

Material Type	3 Colors	7 Colors	Possible Threat
Light Organic	Bronze	Red	Natural gas, gasoline
Organic	Bronze	Bronze	Explosives
Low Density Organic	Bronze	Olive	Narcotic
Mixed	Green	Lime	Jewelry, gems
Light Metals	Green	Green	Powder, detonators
Heavy Metals	Blue	Blue	Weapons, ammunition, knives
Dense Metals	Blue	Purple	Contraband
Impenetrable	Black	Black	Masked dangerous object

7+1 COLOR CODING OPTION

All BV systems come with the 7+1 color material coding option, thus giving the operator more detailed material separation

INTEGRATION INTO GEUTEBRÜCK

Full integration into Geutebrück's Alarm Management System via unival plugin

ADVANCED AI THREAT DETECTION

Artificial intelligence helps to detect and identify even the most concealed threats & contrabands

RELIABLE & SAFE

All BV systems are operational proven under harshest conditions, while providing highest safety and superior image quality

BV X-RAY INSPECTION SYSTEMS

MAKING EMBASSIES
& CONSULATES SAFE

BV 5030CA

BV 6045DV

BV 100100DV

CNRNE DETECTION

BE THE FIRST TO KNOW

In order to react to a catastrophic event, such as toxic gases, chemical warfare agents, smuggled explosives or a radiological exposure, knowledge is key!

Detect and identify explosives and drugs smuggled into your premises, monitor the surroundings and airspace constantly for chemical agents and detect any change of radioactive radiation levels around you with high-end systems provided by unival.

TRACE & CRNBE DETECTORS

PROTECTING YOUR EMBASSY FROM
INVISIBLE THREATS

DE-TECTOR FLEX

The De-Tector Flex is a lightweight desktop trace detector, which provides explosives & drug identification within seconds via swiping.

ROADRUNNER

The Bruker Roadrunner is a handheld trace detector, which can analyze surfaces and gases for drugs and explosives.

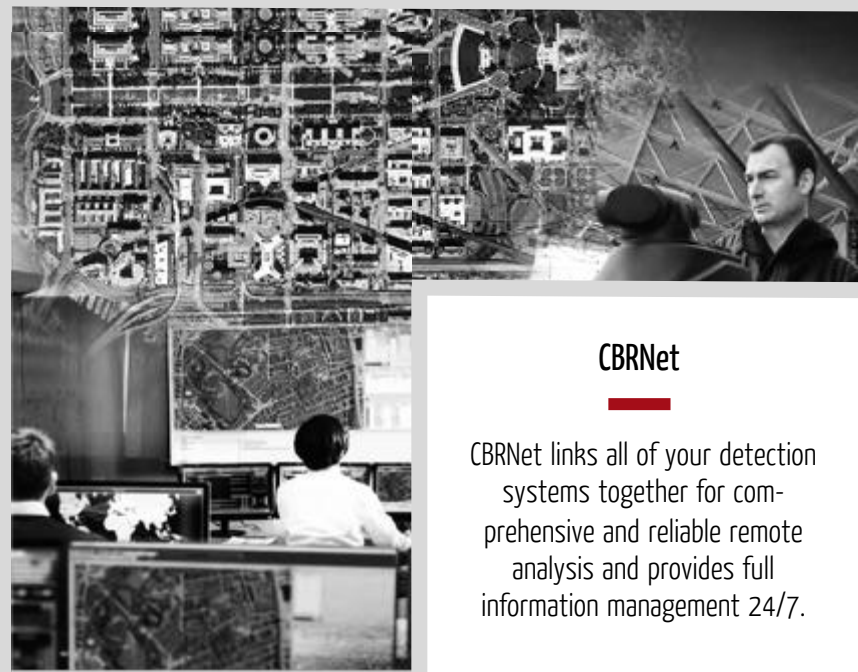

RAPID \textit{plus}

The RAPID \textit{plus} is a complete remote analytic station for detection harmful gases and chemical warfare agents and can be easily installed on a roof.

AT1123

With the highly precise AT1123 dosimeter, gamma & beta radiation levels are constantly monitored around a facility, with an automatic alarm whenever they are increased.

CBRNet

CBRNet links all of your detection systems together for comprehensive and reliable remote analysis and provides full information management 24/7.

A grayscale photograph of a mail room. In the background, there are rows of mailboxes and a person standing near a counter. In the foreground, a woman in a light-colored top and dark pants is walking towards the right. A large white text overlay is centered over the image.

MAIL ROOM SECURITY

MAIL ROOM SECURITY

CHECKING ALL INCOMING MAIL, PARCELS & DELIVERIES

The BV series are used in embassies and consulates worldwide to screen incoming handbags, and visitor's belongings, as well as incoming parcels, mail and supplier deliveries.

The BV series comes with enhanced threat detection capabilities,

FINDING THE THREAT

CONTROLLING INCOMING PARCELS,
MAIL AND DELIVERIES

SCANMAIL 10K

With the Scanmail 10K, up to 10.000 letters per hour can be screened for letter bombs. Easy to operate, safe and reliable

BRUKER TRACE DETECTORS

The Bruker Trace Detectors help to identify any suspicious substance, liquid or gel for explosives and drugs.

BV X-RAY SYSTEMS

With the BV X-ray inspection systems, all incoming parcels and boxes can be X-rayed and analyzed for chemical threats, explosives and contrabands.

WITH SCREENING SYSTEMS PROVIDED BY UNIVAL, 100% OF THE INCOMING DELIVERIES AND MAIL CAN BE SCREENED FOR CHEMICAL THREATS, LETTER BOMBS AND CONTRABANDS.

A grayscale photograph of a man in a white shirt and tie standing in a conference room. He is holding a red handheld device. In the foreground, a laptop on a desk displays a colorful line graph. The room contains several office chairs around a table and a large screen on the wall.

COUNTER-MONITORING

TAP-PROOFED EMBASSIES

COUNTERING ANY TRANSMISSION

Smuggled transmission & recording devices, such as bugs, smartphones, mini phones, wireless mini cams etc., are still one of the major threats in embassies and their premises.

unival offers a wide range counter-monitoring systems, ranging from latest generation digital jamming systems to professional transmission detection & analysis equipment.

SHIELD YOUR EMBASSY AGAINST EAVES- DROPPING

MAKING YOUR CONFERENCES, OFFICES
AND LIVING QUARTERS SAFE

CONFERENCE ROOM JAMMERS MADE IN GERMANY

unival group offers special digital conference room jammers in different sizes and configurations, depending on the size and requirements of the room. All jammers are made in Germany and present the latest jamming technology

uniTAG EMV LC

Create small, local jamming fields on demand without compromising other networks with the uniTAG EMV LC

INTEGRATED ACCESS SECURITY

KEEPING BUGS & TRANSMITTERS OUT OF YOUR PREMISES

In order to screen all incoming persons for transmitters and recording devices, unival offers special screening systems, which discretely screen visitors, staff and other persons for transmitters at the entrance of sensitive areas.

PROHIBIT THE INTRUSION OF TRANS- MITTERS

BV 5030

Check all briefcases, small bags, etc. fast and efficient for any hidden transmitters or recording devices.

uniSCAN FMD 500

The uniSCAN FMD 500 is deployed at data centers or sensitive rooms to detect even smallest transmitters and USB sticks.

**GEUTEBRÜCK
VIDEO SECURITY**

With Geutebrück you will be informed immediately about any intrusions or suspicious behavior of your staff.

A grayscale photograph of a control room. A person is seated at a curved desk, viewed from behind, looking at a wall of multiple computer monitors. The monitors display various data visualizations, including graphs and charts. The room is dimly lit, with light coming from the screens and some ambient lighting.

REMOTE MONITORING

CENTRAL MONITORING

DETECT TRANSMISSIONS IN REAL-TIME

All outgoing transmissions from specific rooms can be monitored with the unival counter-monitoring systems, all operated from a central command & control room.

Even cell phone conversations in sensitive areas will trigger an immediate alarm and can be located directly.

DETECT & MONITOR ALL TRANS- MISSIONS

CENTRAL MONITORING OF ALL
SIGNALS FROM THE COMMAND &
CONTROL ROOM

unival PCM1

Monitor frequencies in conferences and meetings in real-time with the unival PCM1 and analyze the signals immediately.

unival SAM8

Detect and locate cell phone & GSM data transmissions inside your premises.

PHYSICAL SEARCH

SEARCH FOR TRANSMITTERS

USING THE MOST ADVANCED SYSTEMS TO FIND EVERY BUG

Cleaning staff, maintenance personnel, service providers, visitors.... – many people can personally deploy eavesdropping devices and mini transmitters even in a high secure compound like an embassy.

Therefore, the physical search for bugs and transmitters is crucial for embassy security and should be done on regular basis.

With our market leading systems, we give right tools and trainings for such operations, as well as offering professional sweeps by ourselves.

unival CM-SYSTEMS

WHEN MISSING A BUG IS
NOT AN OPTION

unival PCM1

The unival PCM1 provides automatic sweeps for analog and digital transmitters, as well as powerful frequency analysis tools. With the field strength and sonar probes you can pinpoint and locate any bug or transmitting device.

unival HCM1

The HCM1 provides fast scans for bugs in limited spaces or whenever a comprehensive search is not possible.

SCANSILC 2430

See through any object with the portable X-ray Scansilc 2430, which provides even full material discrimination.

DRONE
DEFENCE

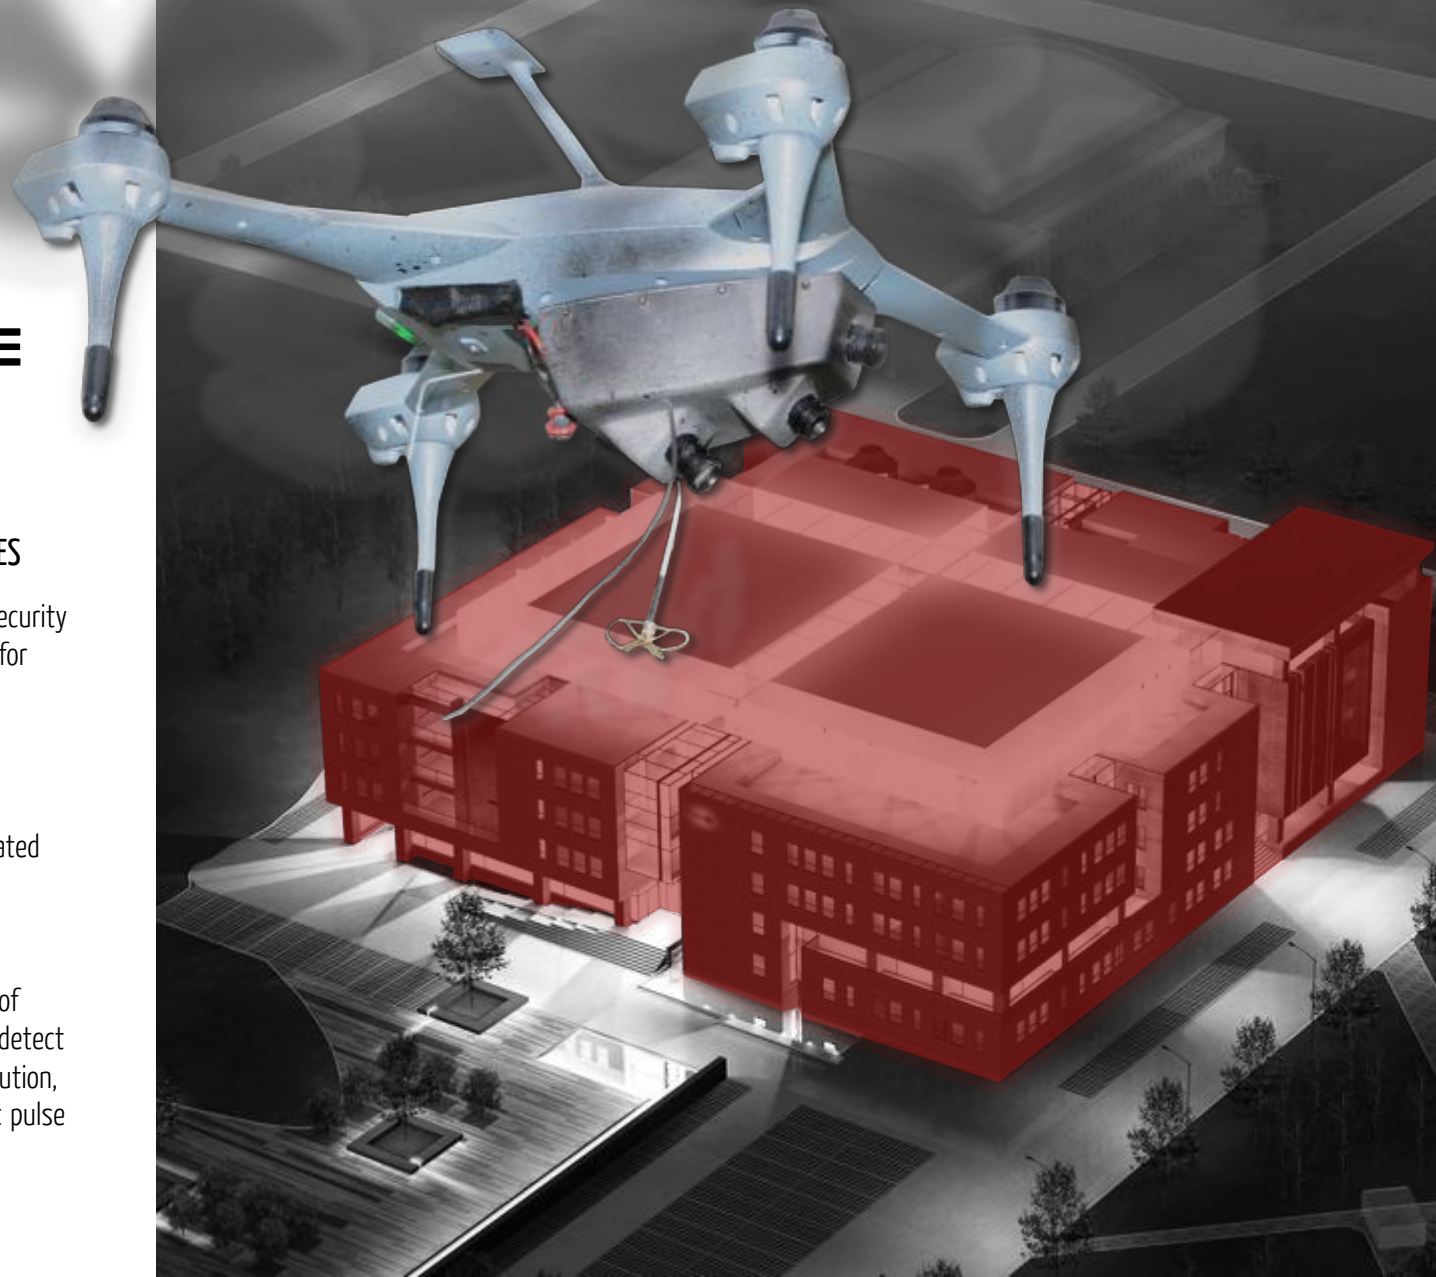

unival DRONE DEFENCE SYSTEM

DETECTION, SOFT- & HARDKILL OF DRONES

Drones and U.A.V.s are becoming a larger security threat for embassies, as they can be used for surveillance, the delivery of weapons or IED assassinations of high-ranking diplomatic personnel.

Especially professional and highly-sophisticated drones are becoming harder to counter by conventional means.

The unival DRONE DEFENCE SYSTEM consists of several specialized subsystems, which can detect incoming drones, jam them or, as a last solution, emit a directed high power electromagnetic pulse (HPEMP) to bring them down on spot.

unival DRONE DEFENCE SYSTEM

REDUNDANT DEFENCE SYSTEMS AGAINST INCOMING DRONES

ALL-IN-ONE SOLUTION

The unival DRONE DEFENCE SYSTEM includes subsystems for detection, identification, soft kill & hard kill of drones

RADAR

The advanced radar system identifies incoming drones all day and in every weather condition

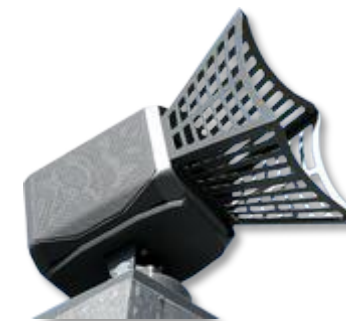

THERMAL FUSION TARGETING

For confirmation and real-time tracking of incoming drones, the T-REX comes as a complete solution with advanced targeting algorithms

JAMMING

The XWJ2 jammer is the first line of defense for a targeted soft kill of the drone, thus forcing her to land, hover on spot or fly back.

HPEM

The High Power Electromagnetic Pulse disables the drone, before it can reach critical locations and is therefore the ultimate defense.

MOBILE SECURITY

XWJ2-C CONVOY PROTECTION JAMMER

JAMMING OF RIEDS AND REMOTELY TRIGGERED EXPLOSIVES

The unival XWJ2 C | CONVOY PROTECTION JAMMING SYSTEM is the newest, state-of-the-art jamming system to counter roadside IEDs.

It is specifically suitable to protect high-ranking diplomatic personnel in high-risk countries, especially when moving VVIPs through a dangerous environment.

unival XWJ2-C

PROTECT YOUR DIPLOMATIC CONVOYS

ALL-IN-ONE SOLUTION

The unival XWJ2-C is a complete Convoy jammer, consisting of the base vehicle, the digital jamming system, special antennas and special vehicle shielding

MODULAR DESIGN

Due to its modular design, the XWJ2-C can be easily maintained, extended and upgraded

INTUITIVE SOFTWARE

The XWJ2-C software allows easy programming and setup of the jammer. Special algorithms are automatically providing optimized settings

MOBILE CHECKPOINT

MSS SCREENING VAN

For protecting high-ranking governmental persons, the MSS SCREENING VAN provides a complete screening checkpoint for every outside event, such as public events, speeches or other venues, whenever needed.

A security perimeter can be set up within minutes, with complete screening, surveillance and access security

MSS SCREENING VAN

COMPLETE CHECKPOINT
SECURITY ON-DEMAND

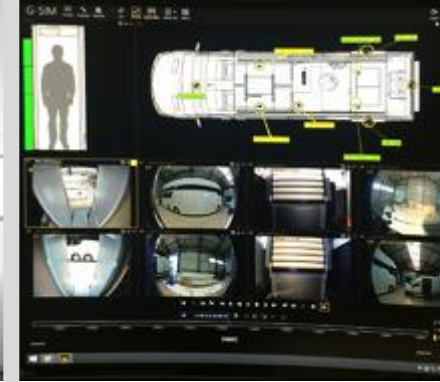

PERSON SCREENING

The MSS SCREENING VAN has integrated person screening systems, such as a walk-through metal detector and others

BAG SCREENING

The integrated BV 5030 baggage screening system provides high-quality X-ray images of any scanned object in real time

SURVEILLANCE

Several cameras provide 360° surveillance, a video stream of the screened objects, facial recognition and other features

1 CEIA o2PN20 WTMD

5 FISCHER-PANDA GENERATOR

9 360° SURVEILLANCE SYSTEM

2 OPERATOR STATION

6 GEUTEBRÜCK SERVER STATION

10 AUTOMATIC ENTRANCE STEP

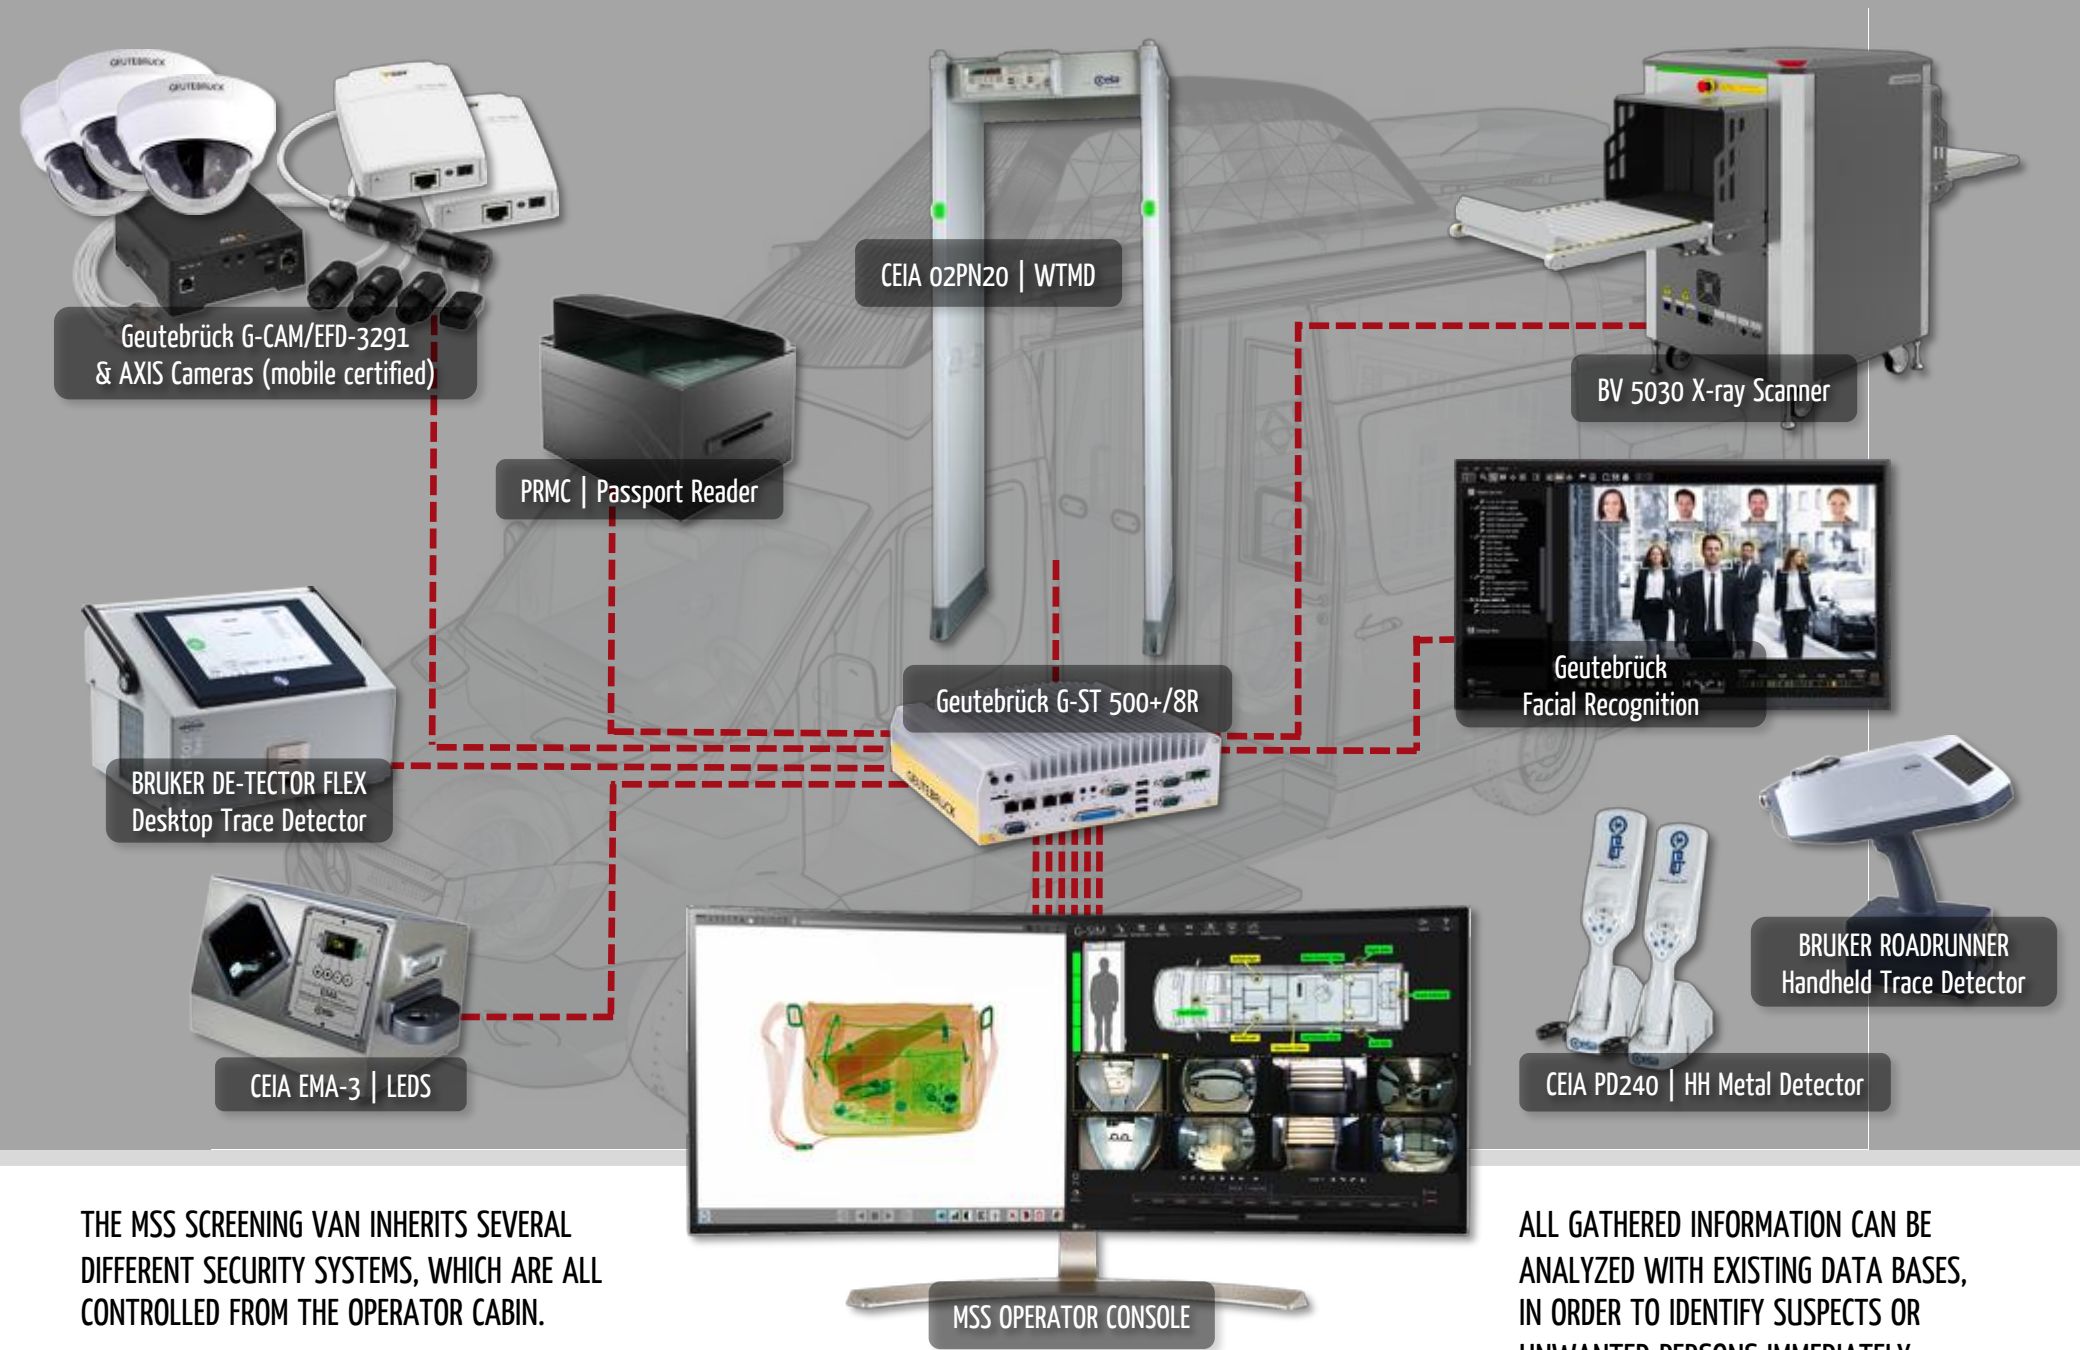

3 CEIA EMA-3 LEDS

7 HIGH-POWER AC/HEATER

11 HYDRAULIC LEVELING SYSTEM

4 BV 5030 X-RAY INSPECTION SYSTEM

8 CERTIFEID GFK ROOF FRAME

THE MSS SCREENING VAN INHERITS SEVERAL DIFFERENT SECURITY SYSTEMS, WHICH ARE ALL CONTROLLED FROM THE OPERATOR CABIN.

ALL GATHERED INFORMATION CAN BE ANALYZED WITH EXISTING DATA BASES, IN ORDER TO IDENTIFY SUSPECTS OR UNWANTED PERSONS IMMEDIATELY.

WITH THE MSS SCREENING VAN, AN EXTENDED SECURITY PERIMETER CAN BE CREATED WITH FULL SCREENING OF ALL INCOMING PERSONS AND VISITORS. THE SECURITY LEVEL CAN BE RAISED ON DEMAND AND ALL UNWANTED PERSONS ARE IDENTIFIED AND KEPT OUT BEFORE EVEN COMING CLOSE.

ARMORED VEHICLES

HIGHEST PROTECTION ARMORED VEHICLES,
TESTED & CERTIFIED IN GERMANY

unival provides high-quality armored vehicles for the protection of governmental staff and diplomatic missions.

Achieving highest protection classes, these vehicles give maximum security and mobility

ARMORED VEHICLES

PROTECT YOUR DIPLOMATIC STAFF

VPAM 9 / B7 EN 1522 BALLISTIC PROTECTION

Full protection against
7.62x51mm NATO P80 AP
and lesser threats

BLAST PROTECTION (SIDE BLAST)

Protected against
15 kg TNT at 2m

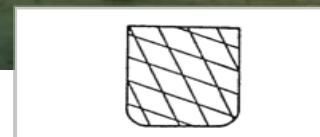

BLAST PROTECTION (FLOOR & ROOF)

Floor is protected against
1x DM31 AP Mine,
2x DM51 hand grenades
1x HG85 hand grenade

BESCHUSSAMT ULM

INTEGRATED VIDEO SECURITY EQUIPMENT IN VEHICLE:

PHYSICAL PROTECTION

EMBASSY SHIELDING

BUILDING PROTECTION ON THE HIGHEST LEVEL

Together with our partner company, we provide high-level building protection, ranging from blast resistant doors & bullet proofed windows up to complete pre-fabricated guard houses.

All building security products are manufactured and designed in Germany and are fully tested and certified, thus reaching the highest protection levels achievable.

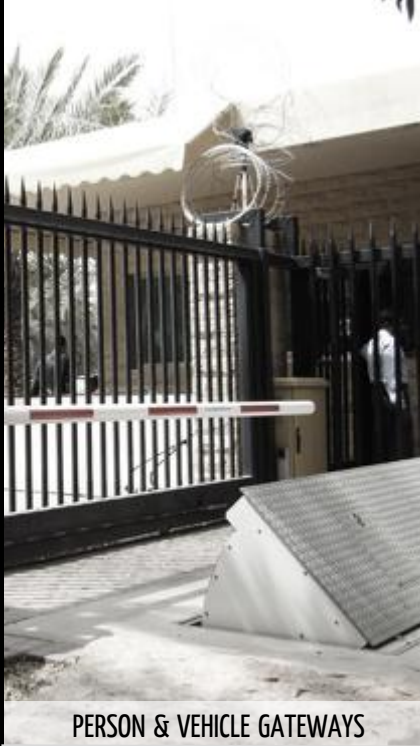

HIGH-QUALITY BUILDING SECURITY

High-security & certified construction solutions, such as

- Ballistic doors and windows,
- Fire protection,
- Gateways & sluices,
- Blast resistant walls,
- Forced-entry protected building parts,
- Blast-protected guardhouses,
- and others...

PERSON & VEHICLE GATEWAYS

GUARDBOUSES

SECURITY GLASS

BLAST FACADES

DOORS & GATES

BUILDING HARDENING

HIGHEST PROTECTION LEVELS

universal and ist partner provide highest protection against multiple threats. Due to our inhouse R&D, we are able to offer resistant classes, where others quit.

We test all of our manufactured items and constructions according to the hardest conditions available.

FORCED ENTRY & BREAK-OUT
ACCORDING TO DIN EN 1627/1630 UP TO RC6

BULLETS
ACCORDING TO DIN EN 1522/1523 UP TO FB7-NS & VPAM 10 (7,62X54 R)

ARTILLERY GRENADE
ACCORDING TO STANAG 2280 UP TO C5

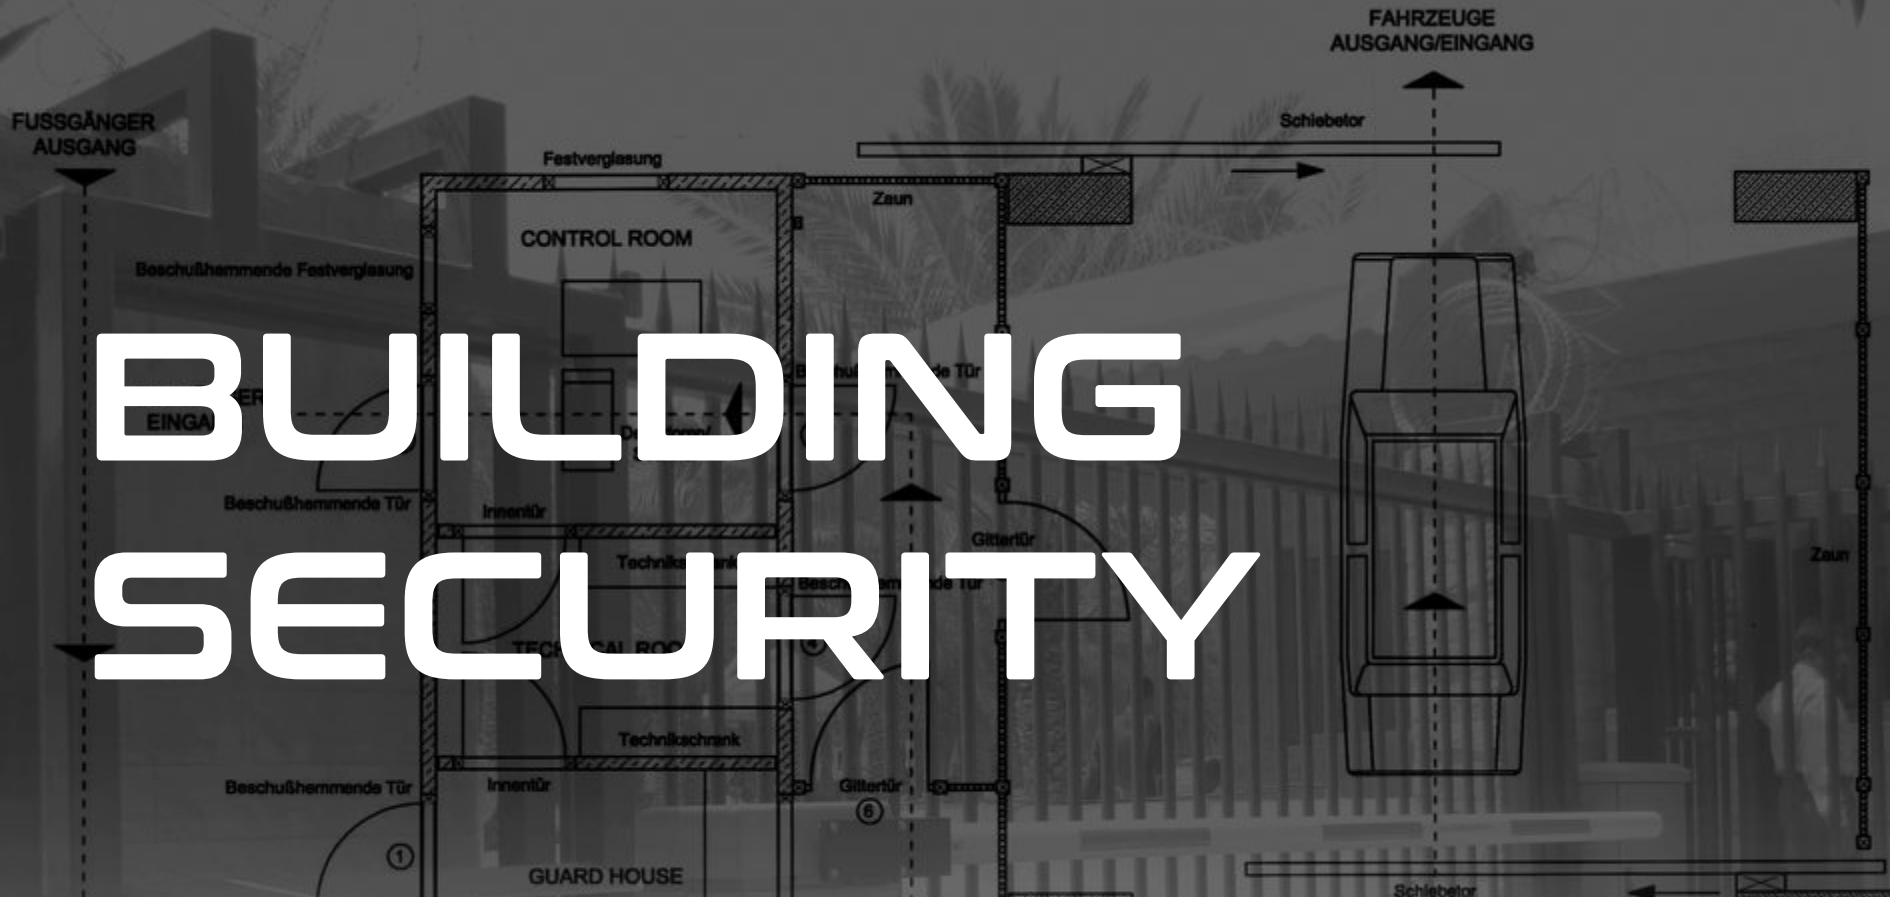

BLAST & EXPLOSION
ACCORDING TO DIN EN 13123 & ISO 16933 UP TO EXR 3 & GSA 3

FIRE
ACCORDING TO DIN 4102 UP TO F90

BUILDING SECURITY

HIGH SECURITY GATES & ENTRIES

ANTI-RAM GATES & ANTI VEHICLE PROTECTION MEASURES

At embassies and consulates we manufacture and integrate highly resistant gates and barriers, in order to prevent any breakthrough of a vehicle.

PROTECTING YOUR ENTRANCE

HIGH SECURITY GATES

Highly customized, different gate types, such as sliding gate, roll gate, turn gate, etc.; All gates are tested and certified.

HIGH SECURITY BOLLARDS

M50 certified bollards for stopping even the largest trucks

VEHICLE GATEWAYS

We design and construct complete vehicle gateways, with the according integration of security measures to shield an diplomatic building against any unwanted vehicle access.

BLAST PROTECTED GUARDBOUSES

HIGHEST PROTECTION FOR STAFF & EMPLOYEES

All of our pre-fabricated high-security guardhouses are specifically designed and tested to withstand explosion blasts up to STANAG level, along with the highest forced-entry and ballistic protection.

SHIELD YOUR BUILDING

HIGH SECURITY WINDOWS

Highest ballistic & blast protection, manufactured in Germany. Turn key installation on-site by special personnel.

HIGH SECURITY DOORS

In the design of the building, but offering highest protection available on the market. Fully tested and certified.

VIDEO SECURITY

SEAMLESS OVERVIEW

- Protection of entrances and exits
- Identification of tampering and smuggling
- Monitoring of inmates
- Documentation of visitors and suppliers

ACCESS CONTROL

- Automatic license plate recording
- Individual definition of access rights
- Interface to access controls (visitors and suppliers)
- Interface to X-ray scanners

ADVANTAGES:

- Complete control of vehicle movements
- Efficient access control and visual documentation
- Central processing of access permits
- Clear reporting of visitors, suppliers and lengths of stay
- Identification of contraband events involving visitors or suppliers

DATA PROTECTION

- Extensive audit and reporting function
- Tamper-proof and conclusive documentation of all reports, operator control actions and changes by administrators

ADVANTAGES:

- Harmonization of all security processes
- Protection against manipulation with an unchangeable audit trail
- Overview of reports with reporting function
