MADE IN GERMANY

The MSS SCREENING VAN is the world's first fully integrated mobile person & object screening checkpoint vehicle, which combines various state-of-the-art security systems in a Mercedes-Benz Sprinter. The MSS is completely developed and manufactured in Germany and equipped with the latest screening technologies for persons and luggage.

Whether for large events, state security, VIP security or perimeter protection - the MSS SCREENING VAN is ready for use within 3 minutes and represents a complete checkpoint with data acquisition & video surveillance. The uniqueness of the MSS SCREENING VAN lies in its high flexibility and mobility, as it provides security on demand, wherever and whenever needed.

GEUTEBRÜCK

# INTEGRATED SECURITY EQUIPMENT

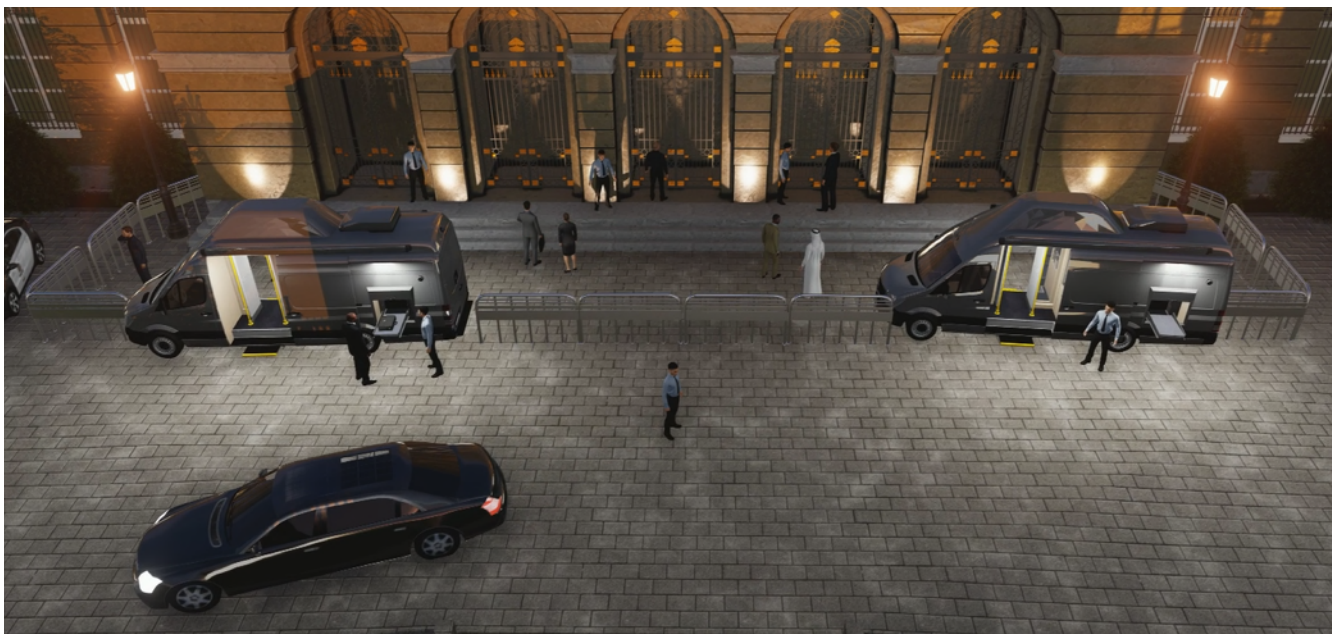

The MSS SCREENING VAN comes with a variety of innovative security systems, covering a wide range of security checks, from metal detection and X-ray analysis to explosives and drug detection.

In addition, user-defined data such as video recordings, facial recognition, passport data and other biometric details are stored in a forensically certified database. The modular security concept can be extended by further systems if required. This makes it easy to adapt to changing security requirements.
