

MODULAR SURVEILLANCE VAN UNIVAL MSV2

SECURITY
made in Germany

The unival MSV2 is the latest generation of the very successful unival surveillance van. It features the newest generation of TONBO video thermal fusion sensors, Geutebrück recording & video analysis, automatic tracking, long-range surveillance, integrated radar, audio surveillance and many other features.

The unival MSV2 can be configured for border surveillance, VVIP protection, evidence collection, crowd monitoring, event protection and other venues.

The analytics and surveillance capabilities can be combined with a drone, in order to extend the reach and distance of the sensors.

PLEASE NOTE THAT THE IMAGES IN THIS DATA SHEET ARE SHOWING A CUSTOMIZED VERSION OF THE unival MSV2.

KEY FEATURES:

- 100% assembled in Germany, according to highest German quality standards
- High-end optical sensors by TONBO
- Automatic tracking algorithms
- Forensic certified video surveillance
- Audio surveillance suite
- Integrated radar
- Automatic leveling system
- Integrated independent power supply
- Drone station (optional)
- German TÜV approved (base vehicle)
