INFRASTRUCTURE  
PROTECTION

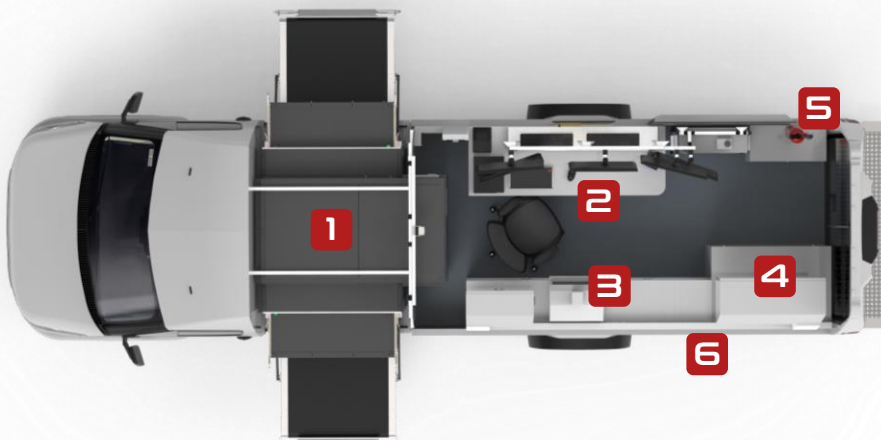

MADE IN GERMANY

The MXV DV | DUAL-VIEW X-RAY VAN is the first mobile and dual-view X-ray scanner with a tunnel opening of 100x100 cm. Normal X-ray screening vans provide in most cases only a single view projection. To detect even the best concealed threats and contraband, a dual-view projection is a must, as it provides an X-ray image of the scanned object from two different views. Aside from its integrated dual-view X-ray scanner, the MXV DV offers several other advantages, such as a professional video security surveillance system, inbuilt GPS, a hydraulic leveling system and more.

Whether for large events, state security, VIP security or perimeter protection - the MXV DV is ready for use within 5 minutes and can screen even largest objects. Therefore, the van provides security on demand, wherever and whenever needed.

## MXV DV FEATURES

- 1** BV 100100MDV  
DUAL-VIEW X-RAY SCANNER
- 2** OPERATOR COMPARTMENT WITH  
G-SIM ALARM MANAGEMENT
- 3** DE-TECTOR FLEX  
TRACE DETECTOR
- 4** INBUILT FISCHER-PANDA GENERATOR
- 5** HYDRAULIC STABILIZATION SYSTEM
- 6** 360° SURVEILLANCE SYSTEM

GEUTEBRÜCK
